

Project Management Consultancy for AI Projects

Structure for AI Services. Strategy for Scale.

- ▶ AI initiatives differ from traditional IT projects—they are data-driven, model-focused, and closely aligned with business context, unlike conventional linear frameworks.
- ▶ IT & ITES consultancy is essential to bridge traditional methods with AI-driven demands, ensuring alignment with technology and business goals.

The result?

- ▶ Missed expectations, poor ROI, and fragile solutions that don't scale.

AI adoption or delivery demands a new playbook combining governance, agility, and adaptive execution.

We offer:

- Diagnostic reviews of current project/delivery structures for AI readiness
- Frameworks to Govern AI services using cognitive workflows (CPMAI-aligned)
- Decision models for Data integrity, Model reliability, and Business fit
- Agile governance dashboards that track model maturity—not just task status

About Us

At PMSoft, we bring decades of expertise in Project, Program, and Product Management to help organizations transform the way they work. As trusted partners to the Pharma, Chemical, IT, and AI domains, we deliver tailored solutions in Training, Consultancy, and Digitalization that empower leaders and teams to achieve measurable results.
